

Week beginning 24<sup>th</sup> June

What a busy week we have had! We began our week with a trip to the beach. Our challenge was to see how many living things live near or by the sea and how much plastic there is on or near the beach? The children had a lovely time exploring the beach, first we collected up any plastic, and brought it back to school to dispose of, and then we investigated all the plants that can be found on the beach.

## Maths

Once again we split into groups, some have been learning their 10 and 5 times tables, and others were comparing fractions whilst the last group worked on subtraction. This week some of the children have been given maths homework, your child will either have a sheet to practice their 2's, 5's or 10 times tables, and this will need to be returned on Monday please.

## PE

We had a lovely time playing cricket.

## Science

Yesterday we learnt about seed dispersal, we all enjoyed exploring the school environment looking for examples of seeds and working out where they had originally come from and how they had travelled to where they were found.

## English

We watched an informative clip on YouTube about the disastrous effect plastic is having on sea animals and our environment. Then we all wrote a reply to the letter we'd received from our MP to explain what we are doing to help towards the problem of plastic pollution, this follows all the work we've been doing whilst learning about plastic pollution.

### Assembly Practice

We have also been very busy practising for our Leavers assembly which takes place on Thursday 18<sup>th</sup> July, please ensure the date is in your diary. We are going to keep the details of what we are doing as a surprise so make sure you come and watch!

### Reward Time

We had a fabulous Friday afternoon investigation time out in the shade.
